Kenbri Fire Fighting B.V.

Kenbri Fire Fighting supplies, maintains and rents out everything in the field of professional fire fighting materials.

With this Kenbri Fire Fighting offers a very wide range of products and services for the (industrial) fire department. At the same time we have a lot of specialized knowledge and experience at our disposal. This unique combination contributes to the distinctiveness of Kenbri Fire Fighting.

The strength of Kenbri Fire Fighting therefore is found in the exclusive dealerships for leading manufacturers for the Dutch market, like a.o: Akron Brass, Kennedy Valve, Angus Fire (a.o. Duraline) and Fomtec.

We work from our 3 locations with a group of about 125 experienced and motivated employees who understand what fire fighting is about. From our locations in Numansdorp and Antwerp (Belgium) we focus ourselves on the industrial fire fighting and incident control. Our sales and / or production activities for (rescue) vehicles and fire fighting equipment take place from our facility in Numansdorp. Our facility in Den Helder is focused on the offshore and maritime market. At all 3 locations we provide a range of service, modification and inspection activities to among others; vehicles, pumps and hydrants. In case of calamities we offer an 24 hour availability, 7 days a week.

Our well trained employees know that the concept of "quality" is of paramount importance. This does not only reflect in our daily activities, but also in the products and services we provide, maintain or rent out. Kenbri Fire Fighting is ISO9001:2008, AQAP2120:2006 and VCA**2008/5.1 approved.

INTRODUCTION

Kenbri Fire Fighting B.V. ▶ Core activities

In addition to supplying and renting out products and services Kenbri Fire Fighting is also strongly focused on its service activities. "Sales, Service and Rental" are the core activities of Kenbri Fire Fighting. These are reflected in the following 3 product groups:

Industrial equipment

A group of specialists is engaged in supplying, maintaining and renting out materials and services for the purpose of the industrial fire fighting and incident control from our branch in Numansdorp. The core assortment of industrial material exists of hydrants, monitors, tank foam systems, valves and pumps. Part of this is a wide range of fire fighting fittings and foam equipment; from handline nozzles to for example an elevated remote controlled monitor. From our location in Den Helder we primarily deliver and maintain extinguishing systems for offshore applications.

Fire fighting equipment

Kenbri Fire Fighting has at its disposal an extensive assortment of firefighting material. We provide each kit according to the regulations of Internal Affairs to equip your fire engine or rescue vehicle. If required we will built the materials directly into your vehicle! Kenbri does not only supply and maintain all materials which enable you to work more effective and / or saver, we also rent them out. Everything from a torch to a set of lifting bags or a complete equipment kit for a fire engine or rescue vehicle.

Vehicles

With its own engineering department and years of expertise Kenbri is the perfect partner for designing and building of customized orders. Everything from a hose vehicle to an airport crashtender.

We also have excellent possibilities for the maintenance or renting of fire engines (with or without operating personnel).

Industrial equipment

The origin of Kenbri Fire Fighting is found in the early 80s with supplying and maintaining of appendages to the (petro) chemical industry. This formed the basis from which Kenbri has gained a lot of specific knowledge and experience in the past 25 years.

Kenbri has an industrial department in the Numansdorp branch, from which a group of specialists work on giving advice and supplying materials and services for the purpose of industrial fire fighting and incident control. Furthermore we are applying our expertise daily in the field of engineering, inspections, approvals and maintenance to extinguishing pipe networks. The development, installing and maintaining of extinguishing installations is one of our specialities. From 2010 this department is also working from the Kenbri branch in Antwerp, this is where Kenbri keeps its large stock of foam. Due to continued growth of the offshore activities, in 2015 there was opened an office in Den Helder. From this location the sales and maintenance of offshore extinguishing systems takes place.

INDUSTRIAL EQUIPMENT

Industrial equipment ▶ Sales

Sales

Our core assortment of industrial material exists of hydrants, valves, monitors, tank foam systems and pumps, etc. In addition we supply a wide range of fire fighting fittings and foam equipment; from handline nozzles to for example an elevated remote controlled monitor. With that we have a variety of foam and powder. The materials advised by us are always of high quality. They are produced by companies with a great track record. In our warehouse in Numansdorp we keep large stocks, which reduce our delivery time to a minimum.

In the last few years Kenbri Fire Fighting has developed itself to an organisation which also takes on project assignments, in which we, together with the client, come to a solution in the field of installation and / or engineering. We offer the complete package: risk analyses, fire preventative solutions, incident control, service and maintenance. Whether it concerns foam, pump or monitor systems, we will always find a suitable solution! Using our knowledge and of course the laws and regulations (e.g. PGS, NFPA) in this field, we can contribute to a ready answer.

Big Flow Systems

The Kenbri Big Flow Systems are designed for first responses during full surface tank fires or any other large scale infernos. These unique mobile extinguishing systems, with capacities of 15,000 to 50,000 lpm are able to fight the biggest fires. The system complies with NFPA20 / PGS29 and can be put together by various modules for each scenario.

Service

Kenbri does not only advise, supply and install industrial materials for fire fighting and incident control; we also take care of the periodic inspections, capacity tests, maintenance and any repairs necessary. Our experienced service technicians periodically certify your hydrants, monitors, valves and tank security systems, but also your fire fighting hoses, hand line nozzles and foam equipment. We can carry out maintenance and repairs on site or in our well-equipped workshop.

Periodic inspections and maintenance are carried out on order, or based on a maintenance and inspection contract. With this contract you are assured to comply with applicable directives, without having to worry about it yourself. This becomes more important with the increasing liability of companies. Moreover, you have a clear picture of the costs.

INDUSTRIAL EQUIPMENT

Industrial equipment ▶ Rental

Rental

Kenbri Fire Fighting also rents out industrial materials for short or longer periods to mainly industrial companies and government agencies. The professional materials are always in excellent condition and are of course inspected before they leave our premises. In this way you are assured that you are working with reliable materials.

In most cases it is possible to hire the material with qualified operating personnel. Examples are a driver / pump operator, an operator for the extinguishing pumps or operating personnel for the safety-units, but also REOB certified technicians for on- and offshore activities and firemen for enforcement services.

The 'supplying' of our operating personnel has a lot of added value. We will always deploy national certified fire fighting personnel, who always have the most relevant experience and the correct papers which are legally requested for the operation of the equipment concerned and for working in an industrial environment.

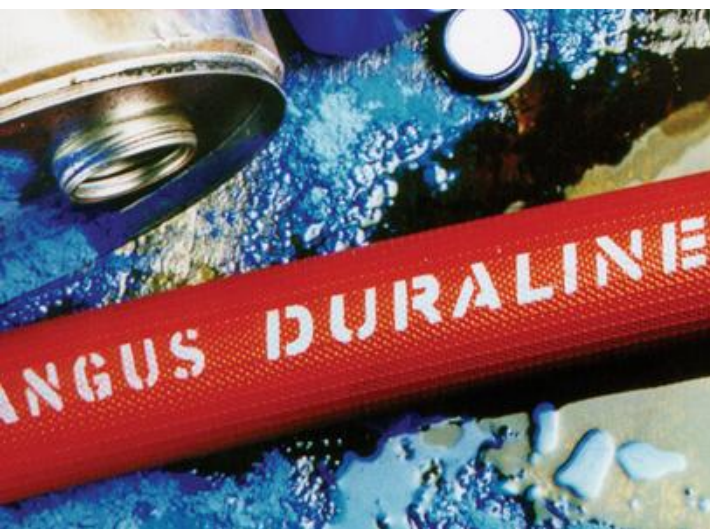

Fire fighting equipment

Kenbri Fire Fighting supplies an extensive assortment of fire fighting material, under which the assortment of Akron (hand line nozzles) and Angus Fire (Duraline hoses and foam).

We provide each kit according to the regulations of Internal Affairs to equip your fire engine or rescue vehicle. Due to our large stock we can normally deliver very fast. Moreover, we would like to act on your personal requirements. On request we can deliver adjustment and casing of material to your specifications. When required we can built the materials directly onto your vehicle! In addition we rent out all materials that make it possible for you to work more effective and/or saver. From a torch to a complete equipment kit for a fire engine or rescue vehicle.

FIRE FIGHTING EQUIPMENT

Fire fighting equipment ▶ Sales

Sales

Kenbri Fire Fighting has many dealerships with leading companies for the Dutch fire fighting market. We have a complete packet of equipment materials including a clothing range and the Heros-xtreme fire fighting helmet to our disposal. Kenbri is also the exclusive partner in the Netherlands for the American manufacturer Akron Brass Company. The monitors and hand line nozzles from Akron are of the highest level when it comes to quality, product development and innovation. This is reflected in things like reach, spray pattern and capacity.

In recent years we have managed to add some major dealerships to our supply program. These include among others Groupe Leader (fans), Hafenrichter (hose maintenance installations), FLIR (TIC's), Fomtec (foam agents) and Angus Fire (manufacturer of Duraline pressure hoses, foam agents and foam hardware).

Service

We only supply fire fighting equipment from reputable manufacturers, which also guarantees the supply of spare parts for maintenance or repair work. Kenbri has the in-house expertise to carry out these activities.

A part of the equipment of a fire engine or rescue vehicle is legally required to undergo an annual inspection and approval. We can provide all of this for you. For each approved or inspected part you will receive a certificate or test report from us. This way you can be sure that your people work with reliable equipment. If required we can provide this simultaneously with the maintenance of your vehicle. The main advantage for you is that your fire engines and equipment do not have to be presented to different authorities at different times.

FIRE FIGHTING EQUIPMENT

Fire fighting equipment ▶ Rental

Rental

In addition to the rental of fire engines equipped with equipment kits, we also rent out separate fire fighting materials, such as low pressure hoses, hand line nozzles, monitors and manifolds. Or a complete equipment kit for a fire engine or rescue vehicle.

We also have all kinds of personal protective equipment for rental on the shelf. From breathing apparatus to helmets and from fire fighting suits to boots. We also have a fully equipped compressed air workshop with a filling station for 200 and 300 bar cylinders.

In most cases the material can be hired with qualified operating personnel. This could be a driver / pump operator, firemen for repressive services and after burning extinguishing activities. The 'supplying' of our operating personnel has a lot of added value. We therefore only deploy national certified fire-fighters (whom in most case also are in possession of the national certificate Pump operator). They always have relevant experience and the appropriate papers which are imposed by law on the operating of the equipment concerned.

Vehicles

Kenbri Fire Fighting can supply all conceivable fire trucks. Kenbri is the eminent partner for customized design and construction. From command vehicle to industrial vehicle combination.

We can take care of all the preventive and corrective maintenance of all your fire engines for your. This applies to both the firefighting technical and the vehicle technical maintenance side. You can also contact us for the rental of almost any type of fire vehicle, such as a fire engine, rescue vehicle, a crashtender or a hooklift vehicle. If necessary it can be hired with the associated services, such as a driver, fireman, mechanic / operator, safety inspector or instructor.

With the exclusive dealership of the PyroLance extinguishing system we also have the opportunity to build an advanced solution in the vehicle for firefighting in enclosed compartments.

Sales

With its own engineering department and years of expertise, Kenbri is the eminent partner for customized design and construction. From hose vehicle to industrial vehicle combination. End of 2011 we took over all activities from C&C Products, specialist in the field of small vehicles and vehicle components (a.o. C&C breathing brackets and ladder racks). Kenbri has continued the building of these customized vehicles (a.o. command vehicles, PM vehicles, Service vehicles and Specials) by former employees of C&C.

E-One

E-One is one of the largest fire engine manufacturers in the world. Its strongly innovative character has resulted in a state-of-the-art programme of high-quality fire fighting and rescue vehicles. Kenbri Fire Fighting has been supplying the complete E-One vehicle programme, including industrial vehicles, tank trucks, emergency service vehicles, ladder trucks and crash tenders, in Europe and the Middle East since 1991.

PyroLance

Kenbri is exclusive dealer of PyroLance in Europe. With PyroLance Firefighters can quickly initiate an offensive attack, seize control of the fire and cool down the interior, all from a safe position outside of the involved compartment.

Service

Kenbri Fire Fighting can accommodate the overall preventive and corrective maintenance of all your fire engines. This applies to both the fire fighting technical and the vehicle technical maintenance side. We execute everything with care and based on detailed inspection lists. With our fully equipped service vehicles, it is possible for our service technician to come to your location. In case of emergencies we offer a 24 hour availability, 7 days a week.

If required, in addition to the maintenance we can also simultaneously inspect and approve the equipment kit of your fire engine or rescue vehicle which by law have to undergo annual inspections. In this way we make it easier for you in terms of logistics and organization and we thereby also reduce the number of days per year that your vehicles and equipment are out of commission. At your request we can provide a replacement vehicle.

Our inspection system to perform periodic safety inspections of fire engines, fire fighting trailers, rescue vehicles, aerial platforms, car ladders and equipment kits, complies to the requirements of the AMTeK Fire brigade system of Aboma + Keboma.

Our mobile pump test unit can easily be used at your site. The unit is equipped with digital flow and pressure gauges, which are calibrated annually.

Rental

We have several fire engines available for rental. They are all equipped with a standard fire fighting equipment kit for and can thus be used directly as a first response vehicle. If desired, they can be supplied with light rescue tools, breathing apparatus or without an equipment kit. We also rent out rescue vehicles, foam extinguishing vehicles, transportation vehicles, crashtenders and fire fighting trailers.

In most case the material can be hired with qualified operating personnel. This could be a driver / pump operator or a operator for fire pumps. The supplying of our operating personnel has a lot of added value. We therefore only deploy national certified fire fighters, whom in most case also are in possession of the national certificate Pump operator. They always have relevant experience and the appropriate papers which are imposed by law on the operating of the equipment concerned.
